

Secure Your Spot for This Important Ag-Specific Training “Asset and Debt Management”

UNCOMMON LEARNING

Sharpen Your Asset and Debt Strategy

Take a deeper dive into your financials with UnCommon Farms' ag-specific “Asset and Debt Management” training—designed exclusively for producers. This course provides essential insights into three key areas: Asset Management, Lender Communication & Debt Analysis, and Equity Management.

In the **Asset Management** portion, you'll learn how to rank your assets for both operational effectiveness and growth potential. Using your financial data from FN101, you'll evaluate which assets are productive or underperforming based on their revenue-generating efficiency.

The **Lender Communication & Debt Analysis** section will equip you with tools to assess how much debt your assets can support. You'll explore how to structure debt in a way that supports cash flow and strengthens lender relationships.

In **Equity Management**, you'll gain a clearer understanding of how and when to leverage equity versus debt for growth. This session helps you build a strategic framework for sustainable financial expansion.

NOTE: You must complete “Taking Control of your Financials” (FN 101) before enrolling in this course.

What's Included

- Two-day intensive financial training
- Lunch for all participants
- Dinner for all participants on the first night
